

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

NOVEMBER 11.

The President, Dr. RUSCHENBERGER, in the chair.

Thirty-two persons present.

The death of J. Aitken Meigs, M.D., a member, was announced.

The following papers were presented for publication:—

“Reply to Dr. M. C. Cook’s criticism of paper on Variability of *Sphæria Quercuum*, Sz.” By J. B. Ellis.

“On a collection of Crustacea from Virginia, North Carolina, and Florida, with a revision of the genera of Crangonidæ and Palæmonidæ.” By J. S. Kingsley.

Correction to paper on Hyraceum.—Dr. A. J. Parker called attention to the fact that in the paper entitled “Note on Hyraceum,” Proc. A. N. S. Philad. 1879, p. 12, sulphydric acid should be substituted for sulphuric acid in fifth line from the bottom of the page.

NOVEMBER 18.

Mr. MEEHAN, Vice-President, in the chair.

Twenty-three persons present.

A paper entitled “On the Stratigraphical Evidence afforded by the Tertiary Fossils of the Peninsula of Maryland.” By Angelo Heilprin, was presented for publication.

On the Genus Garberia.—At the meeting of the Botanical Section, held on 10th inst., Mr. Redfield presented the following communication from Dr. ASA GRAY:—

“I wish to secure an opportunity which occurs to dedicate a genus of plants peculiar to Florida to Dr. A. P. Garber, of Pennsylvania, who has done such good botanical service in his recent faithful exploration of the southern portion of Florida. Among the rest, he has rediscovered the interesting plant which will now commemorate his name and services. This plant is the *Liatris fruticosa*, of Nuttall, before collected only by Mr. Ware in scanty specimens. In the Transactions of the American Philosophical Society (N. Ser., vii. 285), Nuttall formed for it a subgenus, *Leptoclinium*. In the Proceedings of the American Academy of Arts and Sciences, xv. 48, issued only a month ago, I raised this to generic rank, in view of characters which need not here be reca-
